Dear: Mr. Abolfathi,

This reply is in answer to your request on January 18, 2007 for approval for your Fourth Class Power Engineering course in accordance with Section 19 (2) of the Power Engineers, Boiler, Pressure Vessel and Refrigeration Safety Regulation.

Fred Golar and I have reviewed the documentation given to us, and I am granting my approval of your Power Engineering course so that applicants will have a reduction in required experience on successful completion of your course. We do however require that you make application for a power engineer certificate of qualification in this province, as per section 8 of the Regulations. Please complete the enclosed granted certificate application form and return the same to this office at your earliest convenience.

Yours Truly,

Malcolm Bishop
Provincial Safety Manager (Boiler)
British Columbia Safety Authority
